The Probiotic that is *“From the Horse!”*

Natural Enemy of Salmonella, Clostridium & Rota Virus

EquiOtic™ is an innovative live, equine-sourced immunoprobiotic that combines the benefits of *Lactobacillus reuteri* with *Saccharomyces boulardii* to offer horse owners a powerhouse first line defense for the gastrointestinal tract. The hind gut requires a balance of beneficial bacteria for healthy function. That balance can easily be disrupted by stress, surgery, hospitalization, disease, training, travel or dietary changes. EquiOtic™ is an important daily tool in supporting the gastro intestinal system of the horse. Ideal for normalizing foals' GI health. Recommended as a daily feed additive, to assist in the maintenance of normal gut flora.

Why EquiOtic?

- LIVE Equine Cultured Bacteria (*Equine Lactobacillus reuteri*)
- Natural Enemy of Salmonella, Rota-Virus, Clostridium and other Pathogens.
- Modulates GI Immune Response.
- Normalizes Intestinal Flora, pH and Acidity.

Saccharomyces boulardii binds Clostridium

Lactobacillus reuteri on the mucosal surface of the GI tract

Packets for Daily Feeding

Helps to Support Your Horse and Foal During:

- Competitive stress
- Hospitalization
- Diarrhea
- Trailering
- Innoculations
- Disease

*From the Horse,
For the Horse.™*

EquiOtic™

From the Horse, For the Horse.™
Live Equine Sourced Microbial Probiotic

Natural enemy of Salmonella, Clostridium & Rota Virus

Not all probiotics are equal. EquiOtic™ is the stand alone difference in the crowded direct fed microbial field. The horse's gastrointestinal health is a challenge, easily imbalanced by stress, disease, diet, environment, or training. EquiOtic™ polices the GI tract by regulating the surface bacteria with equine sourced *Lactobacillus reuteri* that is cultured from the horse. It has been shown to be effective in killing salmonella and other pathogens while keeping normal gut flora intact.

Only EquiOtic™ delivers billions of live CFUs (Colony Forming Unit) of equine sourced *Lactobacillus reuteri* and *Saccharomyces boulardii*. Our protective packaging guarantees that the bacteria will be alive when administered. Read the research. EquiOtic™ is the obvious choice for gastrointestinal health whether used as a treatment or a daily preventative to maintain a balanced hind gut. Direct fed via highly palatable paste or powder. EquiOtic™ is perfect for health maintenance or to reestablish depleted micro flora population.

Massive numbers of Equine *Lactobacillus reuteri* (Equine LR) in each dosage

Equine LR colonizes on the mucosa

Salmonella cannot bind to the mucosa that is covered in Equine LR

Equine LR secretes reuterin which kills Salmonella on contact!

Massive numbers of *Saccharomyces boulardii* bind pathogens, escorting them out of the body

Equine LR once attached to the mucosa stimulates the immune system via the secretion of metabolites
